Tap2Open's Cloud-based Smartphone Access System

A modern alternative to call boxes, manned gates, and remote guards

TAP2OPEN

RESIDENTS

Residents can easily schedule a single visitor or group and send invitations anywhere there is Internet connectivity

Invitations can be sent simply via SMS, E-mail, or by copy-and-paste

Flexible scheduling allows residents to control exactly when guests may enter

Residents can cancel or update an invitation at any time

GUESTS

Guests avoid long lines and wasted fuel waiting for entry

No need to install an app; a single tap opens an invitation right in the guest's mobile phone's browser

Automatically provides guests with driving directions and entry instructions on their smartphone

COMMUNITIES

The system maintains detailed access logs

No special programming tools required – residents are managed with an easy-to-use web interface

Complements existing access systems and reduces overhead to help cut costs
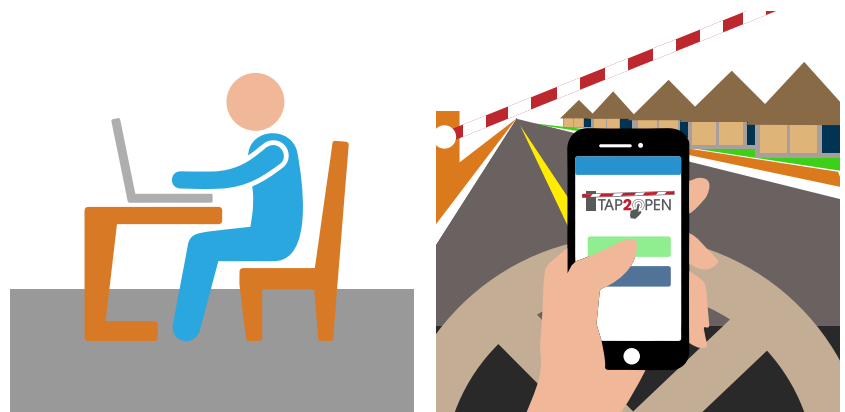

Increased security with less manpower

"Move out" feature ensures past residents' privacy

The Tap2Open™ smartphone access system provides a simple and elegant solution for entry into your gated community: smartphone access! Tap2Open can easily grant temporary physical access to anyone with a GPS enabled smartphone.

Our cloud-based service is easy to use, simple, and convenient for any size installation. There are no servers to setup or software to install.

Residents can use their PC, tablet, or smartphone to send an invitation to their guests. Their guests can use the invitation to access the premises only during the scheduled time when they are at the gate.

Tap2Open is ideal for any electronic entry system such as gated communities, office buildings, storage facilities, parking garages, and apartment complexes.

Unlike access codes, which can be easily shared undesirably, Tap2Open invitations can be locked to a particular guest device or even made "one time use only" for increased security. Residents can even be notified electronically when their guests enter.

Modern, convenient, and secure: Tap2Open is the high-tech solution you've been looking for!

Contact us today and start making your residents feel safer and their guests more welcome!
